

Strong Field Performance

- 5m14 (Jan-May 2014) FFB production reached 354,431 MT compared with 280,859 MT achieved in same period last year or grew 26.2% YoY on the back of better productivity and maturing tree profile.
- 5m14 FFB yield at 10.8 MT/Ha which translated to annualized yield of 26 - 27 MT/ha.
- One of the reasons for strong field performance is also because of good weather in Pangkalanbun, Central Kalimantan, where all of our 34.223Ha planted area located. The area is still experiencing healthy amount of rainfall; therefore possible sign of neutral or weak intensity of El Nino for this year.

	FY13	5m13	5m14	% yoy
FFB Production (MT)	711,098	280,859	354,431	26.2%
Yield (MT/Ha)	21.8	8.5	10.8	

	1Q14
Planted Area (Ha)	34,223
Immature	1,317
Young Mature	9,129
Prime	23,778
